

Money Does Grow on Trees

Even Before You Harvest Them... Maybe

Tuesday, May 24, 2022

6:30P.M.

**Deerassic Park Education Center,
14250 Cadiz Road, Cambridge, Ohio 43725**

No Walk-Ins! Pre-registration required by calling 740-489-5300

Want to understand more about the somewhat new option in forestry, agriculture, and the carbon market? Part of the discussion about air pollution and climate change involves the process of photosynthesis and standing timber. Corporations responsible for air pollution are eager to pay landowners with standing timber to delay harvesting the trees that are storing the carbon that their businesses help to emit. Join us for speakers:

- Mike Estadt, OSU Agricultural & Natural Resources Extension Educator, Pickaway County. **“Carbon Markets: Passing Fad or Long-Term Solution to Climate Change”**
- Anthony Pappas, Consulting Forester, Heritage Habitat & Forestry. **“Important Information and Details of the Forest Carbon Market”**

Sponsored by:

Guernsey County OSU Extension, Guernsey County Farm Bureau, Guernsey County Soil and Water Conservation District, ODNR Division of Forestry, USDA Natural Resources Conservation Service

THE OHIO STATE UNIVERSITY
COLLEGE OF FOOD, AGRICULTURAL,
AND ENVIRONMENTAL SCIENCES

- **If you or anyone in your family are experiencing cold or flu-like symptoms, please stay home.**
